Subject: FW: Bremerton Gasworks Superfund Site - Draft Scoping Memo

Chal,

Thank you for taking the lead on this and as the Mayor stated, yes, DCD will support you throughout this process. As such, I have CCed the people who I would like have to review this document that is described below for the Superfund site in the Marine Industrial area. Please note that I only have requested DCD to comment (I have not asked anyone from any other department or will be following up with Greg).

Janet, Jeannie and Andrea, I have tried to attach the memo that needs review, however it is large so you can locate the document here:

R:\Community Development\Community Development\EPA Reports. It is very likely that you will not have any comments, but this document is very informative (great FYI).

If you DO have any comments, EPA needs the comments no later than September 5th, so please provide them to Chal no later than September 3.

Chal, my only minor comment (which is small potatoes): is on Figure 2-1 (our zoning map on page 129 of the pdf), the Generalized Zoning for the City identifies "parks" incorrectly. There is nothing near the site, so I am uncertain if they will want to change this, but the only park they identified on that map is East Park (not a park) and Illahee Preserve (County). The Figure 1-1 identifies the parks more accurately (but also not stated), so they must have the GIS layer, but David Buffington can get them the Park's GIS layer if need be.

Thanks,

Allison Satter

Thank you Chal,

I believe all our DCD staff will feel grateful and yet willing to back you up on occasion.

Enjoy your weekend.

Patty Lent

Subject: FW: Bremerton Gasworks Superfund Site - Draft Scoping Memo

Who would be most likely to represent the city in this "Super Fund Site" and cleanup?
I want to respect your 2015 work plans and yet feel this issue is of grave concern and we need to stay involved.

Thank you all for assisting me here.

Patty nLent

Subject: Bremerton Gasworks Superfund Site - Draft Scoping Memo

Hi Mayor Lent-

Below is a message regarding the availability of the draft scoping memo that we have distributed to stakeholders. I am writing you separately to request the following:

- 1) Since there were a number of City staff at the scoping meeting, I am requesting that you route this message to the appropriate City staff.
- 2) I am also requesting the designation of a single City staff member that we can coordinate with in the future. While we will continue to keep you on our communication and coordination list, it would be helpful for us to have a single point-of-contact at the staff level for routine communication and coordination. As activities related to the site begin to ramp up, we think this will make for smoother coordination/communication between EPA and the City.
- 3) Should the City have comments on the draft memo, we would appreciate a single set of comments representing the City's perspective.

I am also asking Councilman Wheeler to coordinate with the City Council and provide a single set of comments representing the Council's views.

We look forward to the City's input on the memo and our continued coordination as we move forward.
Thanks.
Bill Ryan

Below you will find a link and access information to the draft scoping memo for the Bremerton Gasworks site for your review. If you have any difficulties opening the document, please let me know.

As I indicated when we met in June, this document is intended to present what is currently known about the site so that we can figure out the types of data and information we need to collect during our remedial investigation of the site. This document does not contain the details of how we will be conducting the characterization work at the site; those details will be contained in a work plan that will be developed later this year (after we complete the scoping memo). We are interested in hearing from you about:

- 1) information you may know about the site that would be relevant to our investigation that is not included in the draft memo;
- 2) information that is currently not in the memo but you think should be in it;
- 3) information in the memo that you think is incorrect; or
- 4) specific data or information that you think should be gathered when we develop the detailed work plan for the investigation.

I am requesting that you (your organization) provide any comments to me (in writing, please) **no later than September 5**. Should the September 5 date pose a challenge for you, let me know. Your comments can be sent to me via email or regular mail using my address found at the end of this message. Your comments will be used to shape the final version of the memo.

If you have no comments, a simple message to that effect would be appreciated (though not necessary). Also, if you simply would like to receive these types of documents in the future, but do not intend to review and comment on them, please let me know.

Thanks for your interest in our work at the site and helping us shape our investigation.

Do not hesitate to contact me with any questions.
